If you are reading this book, it means that you are interested in the information business. And you consider it as a means of making money on the Internet. So before we get started, I want to talk about the benefits of the info business.

In-first, creating your own info business does not require a lot of money capital. For example, I started my infobusiness with only 200 rubles in my pocket. Only the speed of your development and the speed of obtaining results will depend on the budget.

In-second, at the time of writing the book (mid-2013), competition in the infobusiness is still at a very low level. No matter how it looks from the outside, but now there is no serious competition in any niche, but a huge number of niches-free.

AT-third, a well-built infobusiness does not take a lot of time, and part of the profits comes automatically. By the way, we will deal with the creation of just such an information business in this book.

AT-fourth, running an infobusiness is much easier than it seems. There are a huge number of services that will relieve you of worries about technical problems and help you work efficiently, even if the most harmless technical terms scare you. We'll talk more about this in the book.

AT-fifth, the market is already ready to pay for information products, so now is the time to take action and create your own information business. Moreover, there is still enough space in the information business and it becomes simply impossible to satisfy all the demand, as it is growing before our eyes.

You must decide for yourself whether this type of activity is interesting to you or not? If you are not interested, or if you are in doubt, then put this book aside for a few days.-make a decision. Because this book is based on how-to's and steps, it will only help you if you take action.
