The Process

1. **Step 1: Define the problem.** Clearly articulate the problem you are trying to solve. Write it down on a single Post It Note and place it at the center of your workspace.

2. **Step 2: Generate ideas.** Start brainstorming possible solutions by writing them on individual Post It Notes. Don't worry about filtering or evaluating the ideas just yet. The goal is to generate as many ideas as possible in a short amount of time.

3. **Step 3: Organize and categorize.** Once you have a substantial number of ideas on your Post It Notes, start grouping them together based on common themes, similarities, or relationships. This will help you identify patterns, prioritize ideas, and discover new insights.

4. **Step 4: Evaluate and refine.** With your ideas organized, it's time to evaluate their feasibility, potential impact, and alignment with your problem statement. This step allows you to refine and narrow down your options, focusing on the most promising solutions.

5. **Step 5: Act and implement.** Select the best solution(s) from your refined set of ideas and create an action plan for implementation. Assign responsibilities, set deadlines, and monitor progress to ensure successful execution.
