From the mighty T-Rex to the gentle Brachiosaurus, dinosaurs ruled the land during the Mesozoic Era. These colossal creatures came in various shapes and sizes, with herbivores and carnivores dominating their respective ecological niches.

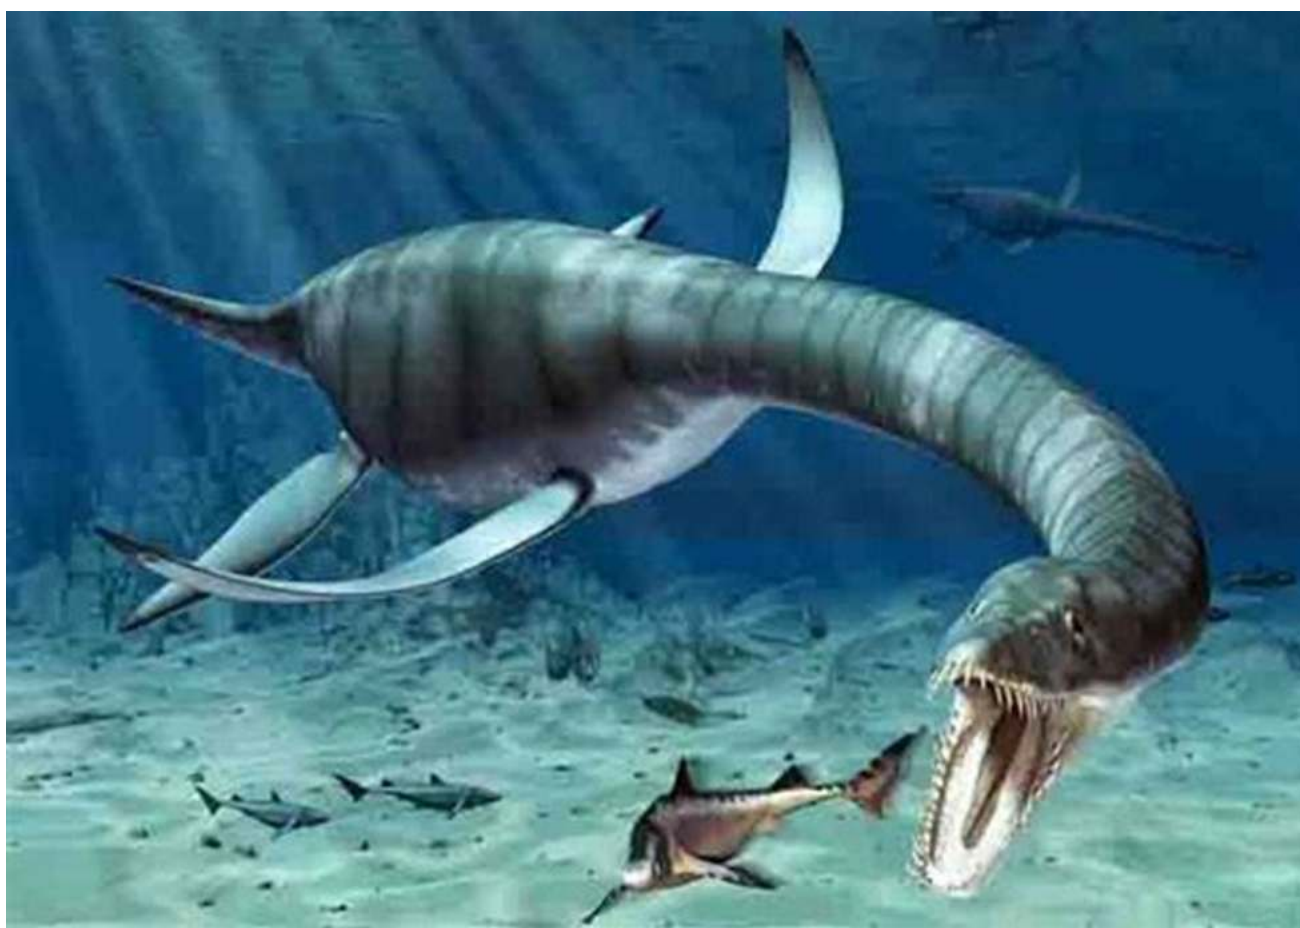

Herbivores like the Triceratops and Stegosaurus were well-adapted to a plant-based diet. They had specialized dental features, such as sturdy beaks and complex dental batteries, allowing them to consume tough vegetation with ease. These majestic herbivores played a crucial role in maintaining the balance of prehistoric ecosystems.

Carnivorous dinosaurs, including the fearsome Velociraptor and the cunning Allosaurus, were fierce predators capable of taking down large prey. Their sharp
