In this story of Roland as I propose telling it, I shall introduce you to some of the most pleasing of those "tales of France" The poems and legends which embody them were written in various languages, and at widely different times; but in them two names, Charlemagne and Roland are of very frequent occurrence. Charlemagne, as you know, was a real historical personage, the greatest monarch of medieval times. His empire included France, the greater part of

Germany and Italy; and his power and influence were felt all over the Christian world. The fame of his achievements in war was heralded and sung in every country of Europe; his name was in the mouth of every story-teller and wandering bard; and it finally became customary to ascribe all the heroic deeds and wonderful events of three centuries to the time of Charlemagne. The songs and stories in which these events were related were dressed up with every kind of embellishment to suit the circumstances of their recital. Wild myths of the Pagan ages, legends and traditions of the Christian Church, superstitious notions of magic and witchcraft, fantastic stories derived from the Arabs of Spain and the East,—all these were blended in one strange mass, and grafted upon a slender core of historical truth. The result was a curious mixture of fact and fiction, of the real and the marvellous, of the beautiful and the impure, of Christian devotion and heathen superstition. And it was thus that "the tales of France", which we may term the legendary history of Charlemagne, came into being.

The Charlemagne of romance is a very different personage from the Charlemagne of history; and the tales which cluster around the name of that monarch must not be regarded as true picture of life and manners during his reign, but rather as illustrations of the state of society at the various times of their composition. In the romances, Charlemagne is represented as the patron of chivalry, and his warriors as possessing all the knightly virtues. But we know, that, in his time, the institution of chivalry did not exist, and that there were no knights. In the tenth century, however, when men first began to write down the tales of France, chivalry was in its prime; and it was but natural that the poet who wrote and sang for feudal chiefs and lords should invest his heroes with knighthood, and represent Charlemagne as the founder of the order.
