Do you want a grasp of the art of successful interviewing? Then continue reading.

Here, I offer you the ultimate guide to the process of preparation for and execution of interviews with more than 100 smart answers to job interview's most frequently asked questions.

It is one thing to know what questions you are likely to face in an interview, be it with a panel or a one-on-one interview; it is quite another to know the right way to answer these questions to optimize your chances of success.

Here, I take you on an exploratory tour of the interviewing world with an evaluation of possible questions you are likely to face and the approaches to answers likely to get you that coveted promotion, job, or grant.

I've lost count of the number of times I really wanted to halt an interview and provide coaching to a job candidate. They look great on paper, and their actual work experience and education is a near-perfect match for my organization. They perform well on the phone screening with human resources, and then they totally blow it when they interview with me in person.

We covered various aspects of interviewing; we delve into greater depth about things you need to know about the interviewing process - how to prepare, how to answer key questions, and how to act during an interview.

I have intentionally condensed all this into a form you can read, absorb, and begin using quickly.

Learn the game, and you can dramatically raise your odds of getting almost any job. For now, I'm going to give you some very high-level basics to incorporate into how you approach and conduct yourself during an interview. If you read nothing else in this book, read these.

Your tone of voice should reflect the material you are responding with, but should never be monotone. You should show excitement, be contrite when appropriate, and be serious or light-hearted, depending on the subject of your response. Be human.

We give a breakdown of different interview questions, scenarios, circumstances, and settings. The immediate environment and your interviewer determine the preparation going into the interview and your chances of success. For example, competency-based questions are different from brain teasers, which differ from traditional, web, or communication questions. Moreover, one-on-one questions or settings differ from a panel interview.

We evaluate all these aspects with a focus on the type of questions you are likely to face, and the most thought-out, universal, and likely-to-impress answers.

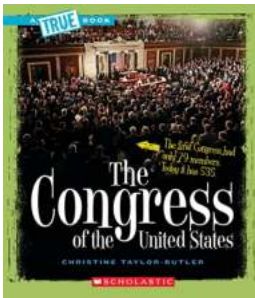

Given this backdrop, if you want an authoritative, insightful, and predictive guide to interviewing, and if you "need" to succeed by "wowing" or "acing" interviews, you really need to read on!

Here is what you are going to discover inside:

- Learn the most basic question you need to ask
