RELIABLE MONTHLY PAYCHECKS  
— *using* —  
CALL, PUT & IRON BUTTERFLY SPREADS  
EVEN IF THE MARKET IS DOING NOTHING

FREEMAN PUBLICATIONS

Are you tired of your stocks just sitting there in your portfolio, not generating any income? Have you been longing for a way to turn those seemingly dull and uneventful stocks into a reliable source of monthly paychecks? Look no further! In

this article, we will explore how you can make the most out of your seemingly boring stocks using call and put options.

## Understanding Call and Put Options

Before we delve into the strategy, let's quickly recap what call and put options are. Call options give you the right, but not the obligation, to buy a specific stock at a predetermined price (known as the strike price) within a certain timeframe. Put options, on the other hand, give you the right to sell a specific stock at a predetermined price within a certain timeframe.

Now that we have a basic understanding of options, let's move on to the exciting part – turning our boring stocks into reliable monthly paychecks!

## The Covered Call Strategy

The covered call strategy is a popular options strategy that can help generate consistent income from your existing stocks. Here's how it works:

1. Identify a stock in your portfolio that you consider to be boring or stagnant in terms of price movement.
2. Choose a strike price above the current market price of the stock.
3. Sell a call option with that strike price, which obligates you to sell the stock if it reaches that price.
4. Collect the premium (the income from selling the call option).

By selling a call option, you are essentially getting paid to wait for the stock to potentially increase in value. Even if the stock remains stagnant or decreases in price, you still earn income from the premium collected.

## **The Protective Put Strategy**

If you own stocks that you are worried might experience a significant decline in price, the protective put strategy can help mitigate your risk. Here's how it works:

1. Select a stock that you believe may face downward pressure in the near future.
2. Purchase a put option for that stock, which gives you the right to sell the stock at a predetermined price.
3. If the stock's price does drop, your put option provides downside protection by allowing you to sell at a higher price.
4. Even if the stock doesn't decline significantly, the put option serves as insurance against potential losses.

With the protective put strategy, you can have peace of mind knowing that your investments are protected, even during market downturns. This allows you to transform your most boring stocks into a reliable source of monthly paychecks.

## **Benefits of Using Call and Put Options**

By employing call and put options, you can achieve several benefits:

- Generate consistent income from stagnant or slow-moving stocks.
- Protect your investments from potential market downturns.
- Take advantage of market volatility by buying or selling options at opportune times.
- Enhance your overall portfolio performance and returns.
- Gain flexibility in your investment strategies.

Don't let your boring stocks sit idle in your portfolio any longer. Take control of your investments and turn them into reliable monthly paychecks using call and put options. Whether you employ the covered call strategy or the protective put strategy, you can generate consistent income and protect your investments from potential losses. So, why wait? Start exploring the world of options and unlock the hidden potential in your most boring stocks today!

Keywords: turn boring stocks into reliable income, call put options, covered call strategy, protective put strategy, generate consistent income, protect investments, market volatility, enhance portfolio performance

**What if you could get an extra \$100, \$200 or even \$500 deposited directly into your brokerage account within the next 24 hours?**

That might sound impossible... but with credit spreads... it's not just a possibility... it's a certainty.

Because with credit spreads, every single trade pays you when you enter it.

And you can use these to generate safe returns, no matter what happens to your stock.

Unlike regular options trading, you don't even need to guess the direction of a stock, or what price it will be in a month.

You only have to guess a price range.

And you can use this strategy to generate income on stocks you don't even own... even if those stocks are moving sideways.

Plus by focusing on only the most reliable moves — you can win as often as 85 times out of every 100 trades — which means you pile up profits that others can only dream about!

All of this without paying a “trading guru” thousands of dollars to learn their system.

Here's just a fraction of what you'll learn inside the book:

- The 8 criteria we use to select the best stocks to write credit spreads – Page 85
- The vital difference between naked and uncovered calls – Page 55
- 10 examples of stock you should never use to trade credit spreads. Amateurs do this all the time and you can lose as much as \$31,000 on a single trade. Learn why these stocks are so dangerous and what to do instead – Page 86
- How to automatically set up take profit levels so you only have to spend a couple minutes each month managing your trades – Page 104
- Options Greeks explained in 10 minutes – Page 44
- Exactly what level the VIX should be at before you sell a spread. A backtest implementing this one tweak made the strategy 50% more profitable over 10 years worth of trades – Page 96
- A simple strategy for selecting the right strike price for your options – Page 160

- The only 3 technical indicators you need to know for credit spreads. Ignore everything else, you only need these 3 beginner friendly metrics to get started – Page 70
- No strategy is risk-free, but on page 101 we show you how to set up your trades to avoid any big losses
- How to find the best credit spreads stocks for free. Stock scanning services will charge you \$300 a year for this information, but our approach costs nothing and lists the exact same companies – Page 81

Plus, inside the book you get free access to a 7 part video course covering every aspect of profitable investing

So even if you've never used options before, the book walks you through everything step by step. You'll find everything explained in plain English, free from technical jargon.

Even if you get stuck, you can always send us an email (provided inside the book) or reach out in our private investing community on social media – we're always happy to help with any questions you might have.

And remember... bank CD's will only pay you between 0% and 1%... the dividend yield on the S&P 500 is around 2%... and 5 to 10 year municipal bonds will only pay between 2% and 3%.

But if you use what's inside this book, you could have the opportunity to earn so much more than that.

And when you receive just a single premium from one of these trades (which is paid into your account instantly) it will cover the cost of this book 10x over.
