

Unlocking Economic Insights: Objectives And Means Lionel Robbins Lectures

The Lionel Robbins Lectures series is a prestigious platform that brings together leading economists and thinkers to delve into key topics related to economics, commerce, and societal welfare. Named after Lionel Robbins, a renowned British economist, the lectures aim to shed light on the objectives and means of economic analysis, providing invaluable insights into the world of economics.

to the Lionel Robbins Lectures

The Lionel Robbins Lectures were established in honor of the late Lionel Robbins (1898-1984), a prominent British economist and one of the key figures in the development of neoclassical economics. Robbins' masterpiece, the book "An Essay on the Nature and Significance of Economic Science" (1932), earned him widespread recognition and solidified his place in the history of economic thought.

The lectures began in the late 1970s, organized by the London School of Economics (LSE) and supported by the Robbins Bequest. The prestigious series has since become a renowned platform where distinguished economists share their expertise, ignite intellectual debates, and offer fresh insights into the complex world of economics.

A noted economist challenges the fundamental economic assumptions that cast economic growth as the objective and markets as the universally applicable means of achieving it.

The global economic crisis of 2008–2009 seemed a crisis not just of economic performance but also of the system's underlying political ideology and economic theory. But a second Great Depression was averted, and the radical shift to New Deal-like economic policies predicted by some never took place. Perhaps the correct response to the crisis is simply careful management of the macroeconomic challenges as we recover, combined with reform of financial regulation to prevent a recurrence. In *Economics After the Crisis*, Adair Turner offers a strong counterargument to this somewhat complacent view. The crisis of 2008–2009, he writes, should prompt a wide set of challenges to economic and political assumptions and to economic theory.

Turner argues that more rapid growth should not be the overriding objective for rich developed countries, that inequality should concern us, that the pre-crisis confidence in financial markets as the means of pursuing objectives was profoundly misplaced.
